

# FURNITURE CLEANING AND MAINTENANCE

Follow our Step-by-  
Step Guideline for  
DIY Repairs

## General Tips:

- Avoid water exposure; dry furniture immediately if wet.
- Minimize direct sunlight and avoid placing hot items on surfaces.
- Limit heavy loads on glass, leather, and drawers.
- Use a soft cloth for regular cleaning and avoid acidic / alkaline cleaners.
- Protect non-cleaned areas during cleaning with mats or tape.

## Wood and Laminates:

- Routine: Dust with a soft cloth.
- Deep Cleaning: Use mild soapy water or a gentle cleaner for stubborn spots.
- Regular Maintenance: Apply wood care products like oil or polish occasionally. Use mats/coasters to prevent heat and water marks. Maintain moderate humidity to avoid cracking or warping.

## Hardware and Metal:

- Routine: Dust with a soft cloth.
- Deep Cleaning: Wipe with a mild soap solution; avoid pouring cleaner directly onto hardware.
- Regular Maintenance: Polish periodically and check for loose screws or hinges, tightening as needed.

## Glass and Mirrors:

- Routine: Dust and remove fingerprints with a soft cloth.
- Deep Cleaning: Apply glass cleaner to a cloth, not directly on the glass. Wipe gently to avoid contact with surrounding materials.
- Regular Maintenance: Apply glass polish periodically to resist stains. Ensure glass and mirrors are securely attached.

## Leather:

- Routine: Dust with a dry cloth.
- Deep Cleaning: Use a specialized leather cleaner or mild soapy water for stains. Avoid pouring cleaner directly on leather.
- Regular Maintenance: Apply leather conditioner or oil periodically. Use protective pads to avoid scratches. Maintain moderate humidity to prevent cracking or mold.
